

## Instructions for Safe n Simple Skin Barrier Pastes

Create an optimum seal around the stoma for a better fitting pouch and protect against leakage.

### **Directions for Application:**

Make sure the skin surrounding the stoma is clean, dry and free from oils, creams, and/or soap residues

1. Remove the cap from the tube

#### **Paste can be applied in two different ways:**

- 1. Apply directly on skin:** Squeeze the paste to fill any crevices, scars or uneven surfaces and apply in a full circle around the base of the stoma...or
- 2. Apply directly on wafer/skin barrier:** Cut the hole in your wafer/pouch first. Then remove the liners from the back of the wafer/pouch. Squeeze the paste to form a complete circle around the hole of your wafer/skin barrier pouching system
3. Press firmly in place with your fingers

### **Directions for Removal:**

1. Use an adhesive remover wipe to remove any residue

**CAUTION: FOR EXTERNAL USE ONLY**
